

PROJECT PROGRESS

In the **III Project Meeting in Radom** the partners, with the help of laboratories, universities, research centers and training centers, began to elaborate the Guide of Best Practices of Environmental Management in Labs.

This guide contains the 42 best practices proposed by the partners and is involved in 9 areas: the use of chemicals, waste management, energy management, water management, other resources, noise, air emissions, wastewater and environmental management systems.

In the **IV Project Meeting in Vienna** concluded with the revision of the Guide of Best Practices of Environmental Management in Labs. The final details of the Eco Lab Technician Qualification Standard were also reviewed to continue with the revision of the online learning platform and the content of the course.

The end of the meeting focused on the organization of the final Conference of the project in Brussels.

BEST PRACTICES GUIDE

After selecting a group of European Environmental Testing Laboratories, these labs have actively participated in the project sharing their Best Environmental Practices.

We have been working hard along the last few months and now that we have the Best Practices Guide ready, we want to thank the collaboration of all the laboratories, universities and training and research centers that have collaborated in its writing and also in the dissemination of the project. **Thank you!**

The selection of the 40 Best Practices has been published on the website in [English](#), [Spanish](#), [Polish](#) and [Greek](#). Check them!

3rd Project Meeting
in Radom (Poland)

4th Project Meeting
in Vienna (Austria)

SAVE THE DATE!

The **final conference of ECVET-Lab** will take place in Brussels on 20 September 2018. Check the [agenda](#) and make your registration following this [link](#). We will wait for you!

TRAINING COURSE

At the IV project meeting in Vienna, the Eco Lab Technician has been revised to continue the review of the online learning platform and the content of the course.

There will be a brief external review of the course to be open to the public. Please stay tuned to our social networks!
